UNIBOR
Airbor
Fully Pneumatic

A completely air powered magnetic drill. A 1/2" air line, 90psi, and 32 cfm are all you need to drill 2"Ø holes through 2" thick material. The unit is specifically designed for use in explosive environments and features a permanent magnet, powerful air motor, anti-static hose, and spark resistant body. A pressurized coolant bottle is also included to maintain a constant flow of coolant.

\$6,500

UNIBOR
UD40A
Fully Automatic

Take all of the guess work out of drilling holes with the UD40A. Operator error is all but eliminated with the feed rate sensor, which senses hard and soft spots in the material and adjusts the feed rate to compensate. This powerful unit drills holes up to 2"Ø through 2" thick material with HSS and carbide cutters.

\$3,800

UNIBOR
E100/32

The only unit you will need if high production of large holes is your business. 2 models are available, SE100/32 with a swivel base and E100/32 without. Both units have a drilling capacity of 4"Ø through 3" thick material, or 1-1/4" using standard twist drills, and are equipped with a 2 speed gearbox plus a variable speed control, and #3 morse taper spindle.

UNIBOR BD35

For steel fabricators and tower erectors the model BD35, weighing just 28 lbs. is light and compact yet can drill up to 1-3/8" Ø through 2" thick material. This unit features a coolant feed system, reversible handles, and powerful magnet. Carrying case is standard. Options include 1/2" chuck, and a pipe adapter kit.

\$1,395

UNIBOR E40

This drill comes standard with a high and low speed gearbox plus full variable speed control. Add to that the flexibility of a #2 Morse Taper spindle and the possible applications for this machine seem almost endless. The powerful 1100-watt motor can drill holes up to 1-7/8" Ø through 2" thick material. A coolant feed system can also be quickly and economically added to this machine.

\$1,850
